DE FERRANTi®

Imagine the most exquisite surfaces – precious beyond your dreams, lost in time and using decorative techniques few modern craftsmen can fathom – and then embark on a journey in search of these riches. Your quest begins at De Ferranti…

Specialist in luxurious surfaces for floor and wall as well as architectural elements, De Ferranti, sources rare and unusual products that are exquisitely beautiful and unbelievably imaginative. Many of the materials replicate the decorative style of important historical buildings in Rome and Athens, often reviving ancient techniques that are lost to the majority of today's artisans. Other surfaces are collected further afield…from North Africa and the Middle East to India and South East Asia.
All of De Ferranti's handpicked craftsmen are adept at combining old methods with modern technology to create products that are ideal for contemporary interiors.

Supplying architects, designers and a range of international private clients, De Ferranti offers unique solutions for residential, commercial and yacht projects no matter how large or small, simple or ornate, whether it's a conservatory floor, the cupola of a chapel or a rock crystal tap head. Overleaf is a Sneak Preview including river pebbles, rock crystal, antique stone, rare marbles and limestone's, semi-precious stones and minerals, pietre dure, scagliola, opus sectile, leather, onyx, metal, molten lava, mosaic and micro-mosaic, glass, gesso, ceramic, majolica, mother-of-pearl, cinnamon bark, bone and horn, coconut shell, carved and pierced stone, wood-fired terracotta, terrazzo, frescos, icons, reclaimed teak and petrified wood – just another taster of the diverse treasures sourced from around the globe.

Visit our new website for a treasure trove of possibilities.
